SUMMARY

I'm a passionate first-year student exploring the intersection of cybersecurity and web development—two fields that excite me for very different reasons. Cybersecurity challenges me to think critically and stay vigilant in protecting digital spaces, while web development fuels my creativity in building user-friendly, engaging platforms. Together, they allow me to merge security with innovation, creating safer and smarter online experiences. Currently, I am building my foundation in network security, ethical hacking concepts, and secure coding practices, while also sharpening my skills in front-end and back-end web development. This combination gives me a unique perspective: I don't just want to design functional websites—I want to design websites that are resilient against modern cyber threats. I'm deeply curious, quick to learn, and motivated by the idea of making the digital world both safe and accessible. Whether it's analyzing vulnerabilities, writing clean code, or experimenting with new tools, I enjoy turning challenges into opportunities for growth. My long-term goal is to grow into a role where I can contribute to cyber defense, secure application design, or ethical hacking while continuing to innovate in user-centric web solutions.

EXPERIENCE

Cyber Security Supervisor

Codec Technologies India

📅 07/2025 - 09/2025 📍 United States

- Led vulnerability assessments and assisted in monitoring network security, identifying and mitigating potential risks.
- Supported incident response activities and documented security protocols to improve organizational resilience.
- Collaborated with senior cybersecurity analysts to test and implement security tools, strengthening system defense against external threats.
- Gained hands-on experience with threat analysis, penetration testing basics, and SIEM tools to detect anomalies.

Web Developer

InternPe

📅 06/2025 - 07/2025 📍 Jaipur, India

- Designed and developed responsive web pages using HTML, CSS, JavaScript, and React, improving site usability and performance.
- Implemented secure login functionality and optimized database queries, enhancing both speed and security.
- Collaborated with a cross-functional team to deliver client-focused projects under tight deadlines.
- Applied best practices in UI/UX design to build user-friendly experiences.

KEY ACHIEVEMENTS

Cybersecurity Projects

Completed 12 cybersecurity projects during 2025 internship at Codec Technologies.

Website Optimization

Optimized a website's load time by 30% using React at InternPe.

Python Automation

Developed a Python-based app increasing task automation by 50% for Zeetron Networks.

Web App Development

Designed 8 web apps improving client engagement by 40% at InternPe.

EXPERIENCE

Python tranee

Zeetron Networks Pvt. Ltd. India

📅 06/2025 - 06/2025 📍 Jaipur, India

- Learned and applied core Python programming concepts including loops, functions, data structures, and error handling.
- Built small automation scripts and beginner-level applications to practice problem-solving with Python.
- Assisted in debugging and testing Python code, ensuring clean and efficient execution.
- Strengthened foundation in object-oriented programming (OOP) and coding best practices.

EDUCATION

Bachelor of Technology - BTech, Computer Engineering

Global Institute of Technology, Jaipur

📅 01/2024 - 12/2028

Minor in Artificial intelligence, Artificial Intelligence

Indian Institute of Technology, Ropar

📅 01/2024 - 12/2025

Associate of Science - AS, COMPUTER AND INFORMATION SCIENCES AND SUPPORT SERVICES

Kendriya vidyalaya

📅 Date period

Minor in Artificial intelligence , Artificial Intelligence

Indian Institute of Technology, Ropar

📅 08/2024 - 05/2025
